Hi Steve,

Sorry for the slow response.

The topics of this workshop are important and well aligned with my research interests. I'd be happy to give a presentation related to contact optimization.

Karen

Dear Steve,

I'm Shunichi Nozawa.

Sorry for late reply and thank you very much for your kind invitation.

It is an honor for us to attend to the workshop.

I'll send a temporary title and abstract:

Title:

**Planning and execution of whole-body environment and object
manipulation with a life-sized humanoid robot**

Abstract:

**In this presentation, we introduce planning and execution system for
whole-body environment and object manipulation with a life-sized
humanoid robot**

**by adaptive selecting of manipulation strategy and robust motion
execution through haptic sensing of actual contact states and object's
motion.**

If I need to send more information, please let me know.

Sincerely,

Shunichi Nozawa

2015-09-10 20:15 GMT+09:00 Steve Tonneau <steve.tonneau@laas.fr>:

Physics-based manipulation under clutter and uncertainty

My research goal is to bridge the gap between what robots can do now and what they are capable of doing. Towards that goal, I will overview some of our recent work on (1) using physics to increase the repertoire of manipulation actions beyond pick-and-place to nonprehensile and whole-arm manipulation, (2) orchestrating this repertoire to reconfigure clutter, (3) using physics to funnel uncertainty via open-loop robust controllers, and (4) representing uncertainty via state estimators and reducing uncertainty via information-seeking actions.

Sidd.

(Rapidly written in motion)

Bonjour Steve

Merci beaucoup pour l'invitation que j'accepte avec plaisir.

**En fonction de ce qui vous arrange, je peux presenter quelque chose dans
le topic 1 aussi bien que dans le topic 2.**

Merci et bien cordialement,

Cuong
